ENSTOR Announces Open Season for Mississippi Facility

HOUSTON -- ENSTOR is conducting an open season for 1.7 billion cubic feet ("Bcf") of firm natural gas storage capacity that is currently subject to a right of first refusal ("ROFR") with a term up to 5 years, beginning April 1, 2010. The open season will be held in accordance with the procedures set forth at Section 3 of the General Terms and Conditions of the FERC Gas Tariff of Caledonia Energy Partners, L.L.C. ("Caledonia"). This open season is separate and distinct from the general open season that was held by ENSTOR between Sept. 16 and Sept. 30, 2009 for firm storage capacity at each of its operational North American facilities.

ENSTOR will begin accepting binding bids for firm storage capacity at its Caledonia facility in Lowndes County, Mississippi, beginning Nov. 10, 2009. All bids will be due by 5:00 p.m. Central time on Nov. 17, 2009.

Bids may be placed online through the ENSTOR website: www.enstorinc.com. All bids will be subject to credit approval prior to their submission. For details, parties interested in bidding should contact Kay Atchison at kay.atchison@enstorinc.com or (281) 374-3075.

Caledonia is a high-deliverability, multi-cycle gas storage facility located in Northeast Mississippi. The facility is connected to Tennessee Gas Pipeline on its 500 Leg in Zone 1, and is located in an area traversed by numerous new and existing interstate pipelines which access the prolific Barnett, Woodford and Haynesville shale production areas. Additionally, this pipeline serves markets in the Northeast, Southeast and Ohio Valley regions.

Caledonia is in an excellent location to service electric power generation and natural gas distribution markets, giving customers access to firm and interruptible storage opportunities.
